Read the following passage and answer the questions :

In the 16th century, an age of great terrestrial exploration, Ferdinand Magellan led the first expedition to sail around the world. As a young Portuguese noble, he served the king of Portugal, but he became involved in the quagmire of political intrigue at court and lost the king's favor. After he was dismissed from service by the king of Portugal, he went to Spain and offered his services to the Emperor of Spain.

Question Numbers : (63 to 65)

Read the following passage and answer the questions :

The world's nuclear plants have accumulated vast stocks of highly radioactive waste. Worldwide, high-level waste is currently stored above ground, and no government has a clear policy on its eventual disposal. While most experts believe that burying the waste is the safest bet in the long term, the problem is finding sites that everyone can agree are geologically stable. Decaying radioactive isotopes release heat. As a result, high-level waste must be constantly cooled; otherwise, it becomes dangerously hot. This is why many experts want to store waste above ground until it has decayed and is cool enough to be stored safely in sealed repositories several hundreds of metres below ground. According to one recent theory, however, waste should be lowered down boreholes drilled to 4 kilometres. The trick is to exploit heat generated by the waste to fuse the surrounding rock and contain any leaking radioactivity.

Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 2 Wrong Marks : 0

It is clear from the passage that the safe disposal of radioactive waste---

- A. is a problem that has not attracted enough attention
- B. remains a global problem of great magnitude
- C. is a problem that each government must decide for its own country
- D. will in all likelihood soon be resolved, and a clear policy agreed upon by concerned governments

Options :

12820637347. A

12820637348. B

12820637349. C

Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 2 Wrong Marks : 0

As it is pointed out in the passage, many experts are of the opinion that radioactive waste -----

- A. should not be stored underground while the radioactive isotopes continue to let off substantial amounts of heat.
- B. does not require to be cooled when stored above ground.
- C. cannot be safely disposed of anywhere and the problem of what to do with it intensifies as the amount increases.
- D. should never be stored underground as it cannot then be monitored.

Options :

12820637351. A

12820637352. B

12820637353. C

12820637354. D

Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 2 Wrong Marks : 0

The passage describes a new method, still only a theoretical one, for the disposal of radioactive waste,

- A. in which the radioactive isotopes are prevented from releasing heat
- B. at a depth considerably less than the normally recommended but the chosen site must meet certain geological requirements
- C. whereby the heat produced by the waste will serve to seal it safely into the rock under which it has been buried
- D. which uses bore holes so that all sites are suitable
