Who has reflected on these methodological nuance of studying CSR- "Definitional, conceptual, and methodological complexity has made cross-cultural, empirical studies rather difficult to conduct. Instead, researchers have tended to focus on conceptual pieces, localized qualitative (i.e., case) studies, or quantitative evaluations of firms within a single country. Multilevel and multi-method studies are noticeably missing, despite an overt academic call for a greater diversity of methods to capture the range of interests in the CSR field"
