Question Paper Name: General Sericulture 09th November 2019 Shift 2
Subject Name: General Sericulture
Creation Date: 2019-11-09 18:01:02
Duration: 180
Total Marks: 100
Display Marks: Yes

General Sericulture

Group Number : 1
Group Id : 709597131
Group Maximum Duration : 0
Group Minimum Duration : 120
Revisit allowed for view? : No
Revisit allowed for edit? : No
Break time: 0
Group Marks: 100

General Sericulture

Section Id : 709597134
Section Number : 1
Section type : Online
Mandatory or Optional: Mandatory
Number of Questions: 100
Number of Questions to be attempted: 100
Section Marks: 100
Display Number Panel: Yes
Group All Questions: No

Sub-Section Number: 1
Sub-Section Id: 709597154
Question Shuffling Allowed : Yes

Question Number : 1 Question Id : 70959712982 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Silkworms seed production centers are known as

- a) Grainages
b) P1 Center
c) P2 Center
d) P3 Center

Question Number : 2 Question Id : 70959712983 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

The private silkworm seed producers are given licenses to produce silkworm seeds and are known as _____

- a) Government Seed producers
- b) Licensed Seed Producers
- c) Private Seed producers
- d) None of the above

Question Number : 3 Question Id : 70959712984 Question Type : MCQ Option Shuffling : No Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Seed organization constitutes a _____ tier system of egg production.

- a) Two tier
- b) Four tier
- c) Six tier
- d) Eight tier

Question Number : 4 Question Id : 70959712985 Question Type : MCQ Option Shuffling : No Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

In Indian condition, _____ of raw silk can be obtained from a hectare of mulberry garden per year.

- a) 20-25 Kg
- b) 30-45 Kg
- c) 80-85 kg
- d) 85-95

Question Number : 5 Question Id : 70959712986 Question Type : MCQ Option Shuffling : No Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

In Jammu and Kashmir, owing to its good climate during autumn and spring, is producing silk by rearing _____ silkworms.

- a) Multivoltine
- b) Bivoltine
- c) Univoltine
- d) None of the above

Question Number : 6 Question Id : 70959712987 Question Type : MCQ Option Shuffling : No Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Philosamia ricini, which produce the eri silk, feeds on particularly _____ plant.

- a) *Ricinus communis*
- b) *Quercus serrata*
- c) *Terminalia arjuna*
- d) *Listen polyantha*

Question Number : 7 Question Id : 70959712988 Question Type : MCQ Option Shuffling : No Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Tasar silk is produced by _____.

- a) *Philosamia ricini*
- b) *Antheraea assama*
- c) *Bombyx mori*
- d) *Antheraea mylitta*

Question Number : 8 Question Id : 70959712989 Question Type : MCQ Option Shuffling : No Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

NSP means _____

- a) National State Project
- b) National Silk Project
- c) National Sericulture Project
- d) Nation Silk Product

Question Number : 9 Question Id : 70959712990 Question Type : MCQ Option Shuffling : No Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Assam produces nearly _____ MT of muga raw silk every year.

- a) 60-70
- b) 90-100
- c) 100-120
- d) 150-170

Question Number : 10 Question Id : 70959712991 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Muga silk produced in the state of _____

- a) Karnataka
- b) Jammu and Kashmir
- c) Madhyapradesh
- d) Assam

Question Number : 11 Question Id : 70959712992 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

The major food plant for the eri silkworm is _____

- a) Mulberry plant
- b) Papaya plant
- c) Caster plant
- d) Som plant

Question Number : 12 Question Id : 70959712993 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Leaf cocoon ratio is

- a) 18 : 1
- b) 10 : 1
- c) 12 : 1
- d) 13 : 1

Question Number : 13 Question Id : 70959712994 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Mother moth examination is done

- a) To control muscardine diseases
- b) To control viral diseases
- c) To control Pebrine diseases
- d) To control bacterial diseases

Question Number : 14 Question Id : 70959712995 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Transferring of chawki worms from egg sheet to rearing tray is called

- a) Silk worm rearing
- b) Hatching
- c) Mounting
- d) Brushing

Question Number : 15 Question Id : 70959712996 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Dolichostylae means-----

- a) Short Pistil
- b) Group of Pistil
- c) Long Pistil
- d) Without Pistil

Question Number : 16 Question Id : 70959712997 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

The history of *Morus* was first classified by -----1753

- a) Hotta
- b) Linnaeus
- c) Bentham
- d) Hooker

Question Number : 17 Question Id : 70959712998 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Arborous means-----

- a) Herbs
- b) Shrubs
- b) Trees
- d) Algae

Question Number : 18 Question Id : 70959712999 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Viswa [DD] variety is a selection from the collections of Doon Vallay of _____.

- a) Uttaranchal
- b) Jharkhand
- c) Chhattisgarh
- d) Telangana

Question Number : 19 Question Id : 70959713000 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

As on today, V-1 is the most sought after variety and presently more than _____ of the cultivated area of mulberry in Karnataka is with V-1 Variety.

- a) 25%
- b) 38%
- c) 68%
- d) 90%

Question Number : 20 Question Id : 70959713001 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Which of these variety is specifically suited for the young silkworm rearing (chawki) with a very soft and succulent texture.

- a) V-1
- b) S-56
- c) G-2
- d) DD

Question Number : 21 Question Id : 70959713002 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

G4 having the chromosome number of $2n=2x=28$ (Diploid) developed at_____.

- a) Berhampur
- b) Houser
- c) Bengaluru
- d) Mysore

Question Number : 22 Question Id : 70959713003 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Bhotera (*Jatropha curcas*) is belongs _____ family

- a) Caricaceae
- b) Euphorbiaceae
- c) Saturniidae
- d) Lauraceae

Question Number : 23 Question Id : 70959713004 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Eri silkworm belongs to _____ family

- a) Caricaceae
- b) Euphorbiaceae
- c) Saturniidae
- d) Laurasia

Question Number : 24 Question Id : 70959713005 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Mulberry belongs to family-----

- a) Solanaceae
- b) Anacardiaceae
- c) Magnoliaceae
- d) Moraceae

Question Number : 25 Question Id : 70959713006 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

NB₄ D₂ is

- a) Univoltinereae
- b) Bivoltine race
- c) Multivoltine race
- d) none of these

Question Number : 26 Question Id : 70959713007 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

India is the largest producer and consumer of silk in the world.

- a) First
- b) Second
- c) Third
- d) None

Question Number : 27 Question Id : 70959713008 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Respiration takes place by

- a) Trachea
- b) Veins
- c) Malphigian tubules
- d) Brain

Question Number : 28 Question Id : 70959713009 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Muga silkworm is endemic to

- a) Manipur
- b) Mizoram
- c) Assam
- d) West Bengal

Question Number : 29 Question Id : 70959713010 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

The completely domesticated non-mulberry silkworm is

- a) Tropical tasar
- b) Muga silk
- c) Temperate tasar
- d) Eri silkworm

Question Number : 30 Question Id : 70959713011 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

The family of the genus, *Anaphae* is

- a) Nactuidae
- b) Bombycidae
- c) Notodontidae
- d) Saturniidae

Question Number : 31 Question Id : 70959713012 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

The scientific name of giant silk moth is

- a) *Attacus atlas*
- b) *Pachypasa otus*
- c) *Anaphae vinata*
- d) *Pinna squamosa*

Question Number : 32 Question Id : 70959713013 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Univoltine race lays

- a) Hibernating eggs
- b) Non- hibernating eggs
- c) Both hibernating and non hibernating eggs
- d) None of these

Question Number : 33 Question Id : 70959713014 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

NB₄ D₂ is

- a) Univoltine race
- b) Bivoltine race
- c) Multivoltine race
- d) None of these

Question Number : 34 Question Id : 70959713015 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Denier is a

- a) Neatness of the silk filament
- b) Lustres of the silk filament
- c) Length of the silk filament
- d) Thickness of the silk filament

Question Number : 35 Question Id : 70959713016 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Univoltine race produces

- a) Only one generation in a year
- b) Two generations in a year
- c) Three generations in a year
- d) Four generations in a year

Question Number : 36 Question Id : 70959713017 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Which state is producing highest tasar silk in India?

- a) Karnataka
- b) Chathisgarh
- c) Madhya Pradesh
- d) Jharkhand

Question Number : 37 Question Id : 70959713018 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Which tasar silkworm is commercially important in Indian tasar silk?

- a) *Antheraea roylei*
- b) *Antheraea assamensis*
- c) *Antheraea mylitta*
- d) *Antheraea sivalika*

Question Number : 38 Question Id : 70959713019 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

ATP, nucleic acids and certain enzymes are the constituents of

- a) Nitrogen
- b) Phosphorus
- c) Potassium
- d) Sulphur

Question Number : 39 Question Id : 70959713020 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Soils with high potassium levels can induce magnesium deficiency in

- a) Clay soils
- b) Alkali soils
- c) Sandy soils
- d) Acid soils

Question Number : 40 Question Id : 70959713021 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

The place or region where flora, fauna and other microorganisms live is called-----

- a) Biodiversity
- b) Conservation
- c) Physiology
- d) Ecology

Question Number : 41 Question Id : 70959713022 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Kanva-2 is widely cultivated in -----India

- a) East
- b) South
- c) West
- d) North

Question Number : 42 Question Id : 70959713023 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

S13 variety is recommended for -----

- a) Rainfed
- b) Irrigated
- c) Moisture
- d) All these

Question Number : 43 Question Id : 70959713024 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

-----monsoon season is suitable for mulberry planting

- a) East-west
- b) South-west
- c) North-south
- d) East-North

Question Number : 44 Question Id : 70959713025 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

The soils that have been formed mainly as a result of intense weathering under humid climate and heavy precipitation are

- a) Forest soils
- b) Desert soils
- c) Alluvial soils
- d) Laterite soils

Question Number : 45 Question Id : 70959713026 Question Type : MCQ Option Shuffling : No Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

The soils that are subjected to dislodgement due to landslides and snowfall are

- a) Red soils
- b) Alluvial soils
- c) Desert soils
- d) Mountain soils

Question Number : 46 Question Id : 70959713027 Question Type : MCQ Option Shuffling : No Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

The soils that are covered with a thick brown mantle which inhibits plant growth are

- a) Mountain soils
- b) Desert soils
- c) Alluvial soils
- d) Peaty soils

Question Number : 47 Question Id : 70959713028 Question Type : MCQ Option Shuffling : No Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Soil _____ is the most important factor in deciding the type of microorganisms present in the soil.

- a) Texture
- b) Moisture
- c) Structure
- d) Consistence

Question Number : 48 Question Id : 70959713029 Question Type : MCQ Option Shuffling : No Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Soil for mulberry has to maintain the plants for sustained and productivity of _____ leaves.

- a) Quality
- b) Infested
- c) Infected
- d) Inferior

Question Number : 49 Question Id : 70959713030 Question Type : MCQ Option Shuffling : No Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

The ideal soil pH for cultivation of mulberry is

- a) 5.2 to 5.8
- b) 6.2 to 6.8
- c) 7.2 to 7.8
- d) 8.2 to 8.8

Question Number : 50 Question Id : 70959713031 Question Type : MCQ Option Shuffling : No Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Silk reeling industry technological development divided into how many periods

- a) Two major periods
- b) Three major periods
- c) Four major periods
- d) Six major periods

Question Number : 51 Question Id : 70959713032 Question Type : MCQ Option Shuffling : No Display Question Number : Yes Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Western Technology for mechanized silk reeling was introduced during

- a) 1870
- b) 1890
- c) 2000
- d) 1978

Question Number : 52 Question Id : 70959713033 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

During which period mechanized silk reeling was transformed and adapted in Japan.

- a) 1880-1912
- b) 1875-1900
- c) 1870-1900
- d) 1890-1979

Question Number : 53 Question Id : 70959713034 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Eri silk is produced by -----

- a) *Antheraea assamensis*
- b) *Antheraea mylitta*
- c) *Philosamia recini*
- d) *Bombyx mori*

Question Number : 54 Question Id : 70959713035 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Undomesticated silk is called as

- a) Mulberry silk
- b) China silk
- c) Tussah silk
- d) Wild silk

Question Number : 55 Question Id : 70959713036 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Which country is the unique distinction of producing all the commercial varieties of silk

- a) China
- b) India
- c) Japan
- d) USA

Question Number : 56 Question Id : 70959713037 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Government as a _____ in promoting, adopting and implementing silk production.

- a) Mediator
- b) Agent
- c) Ambassador
- d) None of the above

Question Number : 57 Question Id : 70959713038 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Huge _____ costs are again a constraint.

- a) Water short doubling time
- b) Electricity
- c) Labour
- d) ECL do not show much evidence of spatial orientation

Question Number : 58 Question Id : 70959713039 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Cost are involved in procuring _____ quality eggs

- a) Good
- b) Bad
- c) Moderate
- d) All the above

Question Number : 59 Question Id : 70959713040 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Objective of cocoon testing and grading is

- a) Good sale transaction
- b) Bad sale transaction
- c) Transportation
- d) Maintenance

Question Number : 60 Question Id : 70959713041 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Required artificial light for cocoon testing is

- a) 500 volts
- b) 500 lux
- c) 500 Watts
- d) 500 meter

Question Number : 61 Question Id : 70959713042 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Double cocoons are _____

- a) Inferior
- b) Superior
- c) Good
- d) Mountage

Question Number : 62 Question Id : 70959713043 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Cottage basin and multi end Basin reeling units adopt _____ system of reeling

- a) Floating system of reeling
- b) Sunken system reeling
- c) Both a & b
- d) None of the above

Question Number : 63 Question Id : 70959713044 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

In floating system of reeling the cocoon cavity is _____ filled with water

- a) Completely
- b) Submerged
- c) Partially
- d) None of the above

Question Number : 64 Question Id : 70959713045 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Function of Croissure

- a) End catching
- b) Inter twining of silk thread
- c) Thread Guiding
- d) None of the above

Question Number : 65 Question Id : 70959713046 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Components of Charaka-

- a) Mud-platform
- b) Tarpatti
- c) Thread Guide & Reel
- d) All the above

Question Number : 66 Question Id : 70959713047 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Different types of silk reeling are

- a) Charaka
- b) Filature
- c) Automatic Reeling Machine
- d) All the above

Question Number : 67 Question Id : 70959713048 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Jetteboute is a

- a) End catching devise
- b) Cooking devise
- c) Reeling devise
- d) Brushing devise

Question Number : 68 Question Id : 70959713049 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Cocoon cooking is done to

- a) Remove sericine
- b) To soften sericine
- c) To retain sericine
- d) None of the above

Question Number : 69 Question Id : 70959713050 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Cocoon drying is done to

- a) Kill the pupa
- b) Kill the moth
- c) Kill the larva
- d) None of the above

Question Number : 70 Question Id : 70959713051 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Standard pH of reeling water is

- a) 6.9
- b) 8.0
- c) 5.9
- d) 4.5

Question Number : 71 Question Id : 70959713052 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Turbidity is measured by using

- a) Galveno meter
- b) Volt meter
- c) Turbidity meter
- d) Thremo meter

Question Number : 72 Question Id : 70959713053 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Reeling is a process of -----filament from the cocoons

- a) Pulling
- b) Twisting
- c) Unwinding
- d) Cooking

Question Number : 73 Question Id : 70959713054 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Charaka reeling is operated by ----

- a) Power
- b) Manually
- c) Gas
- d) bullocks

Question Number : 74 Question Id : 70959713055 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Charaka is a -----reeling machine

- a) International
- b) Domestic
- c) Multiend
- d) None

Question Number : 75 Question Id : 70959713056 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Warping machine mainly consist of

- a) Weaving process
- b) Warping Creel
- c) Warping drum
- d) Both b) & c)

Question Number : 76 Question Id : 70959713057 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Shedding is a

- a) Primary motion
- b) Secondary motion
- c) Tertiary motion
- d) None of the above

Question Number : 77 Question Id : 70959713058 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Tenacity of silk is calculated as

- a) Grams/Denier
- b) Kilos/Denier
- c) Pounds/Denier
- d) Microns/Denier

Question Number : 78 Question Id : 70959713059 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Silk protein has excellent moisture absorbing and desorbing properties

- a) Fibroin
- b) Sericin
- c) Silkin
- d) None of the above

Question Number : 79 Question Id : 70959713060 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

The three characteristics of silk evaluated under visual test are

- a) Winding – gums – Foreign particles
- b) Knots –colour – Flyer
- c) Uniformity – General finish – Nature
- d) Flyers-Nature-Nurture raw silk

Question Number : 80 Question Id : 70959713061 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Who discovered the silk for the first time.

- a) XI Ling Shi
- b) Si-Ling –Chi
- c) Ling-Shi
- d) Chi-Shi

Question Number : 81 Question Id : 70959713062 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

When the silk was discovered.

- a) 2100 BC
- b) 1200 BC
- c) 2640 BC
- d) 2400 BC

Question Number : 82 Question Id : 70959713063 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Silk is a.

- a) Man made fiber
- b) Organic fiber
- c) Synthetic fiber
- d) Natural fiber

Question Number : 83 Question Id : 70959713064 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Weft stop motion is a

- a) Primary motion
- b) Secondary motion
- c) Auxiliary motion
- d) None of the above

Question Number : 84 Question Id : 70959713065 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Power loom runs by

- a) Mechanical power
- b) Solar power
- c) Motor power
- d) Human power

Question Number : 85 Question Id : 70959713066 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Separation of Warp threads in loom is done by

- a) Picking
- b) Beating
- c) Shedding
- d) Looming

Question Number : 86 Question Id : 70959713067 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Cocoon transaction between rearer and reeler is called

- a) Silk market
- b) Cocoon market
- c) Silk Exchange
- d) Weaving center

Question Number : 87 Question Id : 70959713068 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Unwinding of silk filament is known as

- a) Twisting
- b) Doubling
- c) Reeling
- d) Moulting

Question Number : 88 Question Id : 70959713069 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Silk exchange is called as

- a) Silk market
- b) Silk route
- c) Silk Board
- d) Silk map

Question Number : 89 Question Id : 70959713070 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Silkworm spinning take place at _____

- a) 3rd instar
- b) 4th instar
- c) 5th instar
- d) 6th instar

Question Number : 90 Question Id : 70959713071 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

The central silk board has constituted a study to empower women in sericulture and it gave _____ amount

- a) 10 Cr
- b) 50 Cr
- c) 50 lacs
- d) 25 Cr

Question Number : 91 Question Id : 70959713072 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Large amount of bivoltine silk produced in

- a) Tamil Nadu
- b) Karnataka
- c) Andhra Pradesh
- d) Kerala

Question Number : 92 Question Id : 70959713073 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Major portion of cost of production in sericulture goes for

- a) DFLs
- b) Labour
- c) Leaf
- d) Irrigation

Question Number : 93 Question Id : 70959713074 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Among the mechanical powers, account for the largest share of farm power in India.

- a) Tractor
- b) Power sprayer
- c) Grass cutter
- d) None of the above

Question Number : 94 Question Id : 70959713075 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

A worker can prepare 1500 cuttings per day, whereas a machine can preparecuttings.

- a) 1500/day
- b) 2000/day
- c) 1500/h
- d) 4000/day

Question Number : 95 Question Id : 70959713076 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Sericulture is also regarded as a supplementary crop to.....

- a) Fishery
- b) Agriculture
- c) Animal husbandry
- d) Sugarcane

Question Number : 96 Question Id : 70959713077 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Income from sericulture activities is influenced by

- a) Soil condition
- b) Silkworm race
- c) Mulberry variety
- d) All the above

Question Number : 97 Question Id : 70959713078 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

Karnataka produces _____ of raw silk

- a) 2450 metric tones
- b) 8219 metric tones
- c) 3760 metric tones
- d) 9560 metric tones

Question Number : 98 Question Id : 70959713079 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

The employment potential of sericulture indicated engagement of nearly _____ man
days of labour per acre per year.

- a) Less than 300
- b) More than 400
- c) 350 - 360
- d) None of the above.

Question Number : 99 Question Id : 70959713080 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

_____ % of farmers in India rears the young-age silkworms in the dwelling houses.

- a) over 45
- b) over 55
- c) over 65
- d) Over 85

Question Number : 100 Question Id : 70959713081 Question Type : MCQ Option Shuffling : No Display Question Number : Yes
Single Line Question Option : No Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0

In India, _____ % of the silk is reeled on charaka

- a) 25 %
- b) 50 %
- c) 75 %
- d) 100 %
