		A1 : hand in gloves with them		
		A2 : counting on them		
		A3 : sitting on the fence		
		A4 : reading between the lines		

Case Study from Question No. 93 to Question No. 96

		In the field of science, one of the distinguished names is that of Madame Marie Curie. She, along with her husband, Pierre Curie, discovered radium that is widely used in the treatment of cancer. Pierre and Marie's amicable collaboration later helped to unlock the secrets of the atom. Born in 1867 in Warsaw, Poland, Marie displayed a brilliant and blithe personality at an early age. Her great exuberance for learning prompted her to continue with her studies after school. She became disgruntled, however, when she learned that the university in Warsaw was closed to women. Determined to receive a higher education, she defiantly left Poland and in 1891 entered Sorbonne, a French university, where she earned her master's degree and doctorate in Physics. In 1895 Marie got married to Pierre Curie, another scientist, and together they spent many productive years working together in the physics laboratory. After they discovered radium, Pierre was killed by a horse drawn wagon in 1906. Marie endured heartbreaking anguish and the fact that she had two young daughters to raise by herself greatly increased her distress. Curie's feeling of desolation finally began to fade when she was made a physics professor at Sorbonne, becoming the first woman professor at the world famous university. In 1911, she was awarded the Nobel Prize for isolating radium. The long exposure to radium caused a fatal illness to her but she never became disillusioned about her work and dedicated her life to science.	4.0	0.00
93	93	The Curies' _____ collaboration helped to unlock the secrets of the atom. A1 : friendly A2 : competitive A3 : courteous A4 : industrious	1.0	0.00

95	95	What lesson can be drawn from the above passage ? A1 : One has to study science to be intelligent A2 : One should pursue his/her passion with complete dedication A3 : One should abide by the rules and not challenge authority A4 : One has to be physically strong to achieve success	1.0	0.00
96	96	Even though Marie Curie became fatally ill due to exposure to radium, she was never _____.	1.0	0.00

		A1 troubled : A2 disturbed : A3 disappointed : A4 delighted :		
Case Study from Question No. 97 to Question No. 100				
		Yoga is an ancient Indian tradition that aims towards a healthy mind in a healthy body. It has been part of the lifestyle of Indians from time immemorial. The act of practicing yoga has an impact on an individual's mind, body and soul. The word “yoga” comes from Sanskrit and means “join” or “unite”, to symbolize the unity of the body and consciousness. Yoga was founded by Patanjali very many centuries ago, during the pre-Vedic times. He codified yoga practices in the <i>Yogasutras</i>. Today it is practiced practically all over the world in different forms and continues to grow in popularity. The International day of yoga is celebrated on June 21st every year since 2015. Its aim is to raise awareness worldwide about the benefits of practicing yoga. June 21st is the day of the Summer Solstice when the earth's axis in the northern hemisphere is the most inclined towards the sun. According to yoga practitioners, this is the most appropriate and fruitful time for meditation.	4.0	0.00
