Given below are two statements, one is labelled as **Assertion A** and the other is labelled as **Reason R**

Assertion A: A System Model renders the complex learning processes in to explicable, real entities.

Reason R: The System Model is composed of few real variables and the learning processes appear realistic, convincing and easy for learners as the input and processes, which are real entities, can be controlled to obtain the required learning output.

In light of the above statements, choose the **correct** answer from the options given below

1. Both **A** and **R** are true and **R** is the correct explanation of **A**
2. Both **A** and **R** are true but **R** is NOT the correct explanation of **A**
3. **A** is true but **R** is false
4. **A** is false but **R** is true
