"The *Access and Benefit-sharing Clearing-House* (ABS Clearing-House) is a platform for exchanging information on access and benefit-sharing established by Article 14 of the Protocol, as part of the Clearing-House of the Convention established under Article 18, paragraph 3 of the Convention. The ABS Clearing-House is a key tool for facilitating the implementation of the Nagoya Protocol, by enhancing legal certainty and transparency on procedures for access and benefit-sharing, and for monitoring the utilization of genetic resources along the value chain, including through the internationally recognized certificate of compliance. By hosting relevant information regarding ABS, the ABS Clearing-House will offer opportunities for connecting users and providers of genetic resources and associated traditional knowledge".

(Extract from "Nagoya Protocol on Access and Benefit-sharing" website)

Please read the extract carefully and choose the elements which have been mentioned in it:

1. The Clearinghouse will provide avenues for linking suppliers and users of genetic resources
2. The ABS Clearing House provides legal clarity and transparency on procedures for access and benefit-sharing
3. A platform for exchanging information on access and benefit-sharing is established by Article 14 of the Protocol
4. All of these

Consider the following:

a. **Statement of Problem:** Our dependence on fossil fuels is an issue of great concern. In the coming decades, India has to reduce its dependence on Fossil Fuels as a source of energy in order to protect our environment

b. **Statement of proposed solution:** India has invested heavily and will be investing more in the coming years for harnessing solar energy

Based on (a) and (b) above, which of the following statements is most accurate?

1. (a) is an important problem concerning the environment in India and (b) could be one of the solutions
2. (a) is an important problem concerning the environment in India and (b) is the only solution
3. (a) is an important problem concerning the environment and (b) is not a solution
4. None of these

Question Number : 52 Question Id : 9409185509 Question Type : MCQ Option Shuffling : No Is

Question Mandatory : No

Correct Marks : 1 Wrong Marks : 0

"Perhaps our most urgent task today is to persuade nations of the need to return to multilateralism. The challenge of reconstruction after the Second World War was the real motivating power behind the establishment of our post-war international economic system. The challenge of finding sustainable development paths ought to provide the impetus - indeed the imperative - for a renewed search for multilateral solutions and a restructured international economic system of co-operation. These challenges cut across the divides of national sovereignty, of limited strategies for economic gain, and of separated disciplines of science".

(Extract from Report of the World Commission on Environment and Development: Our Common Future)

Which of the following is implied in the extract given above?

1. Many countries of the world are resorting to unilateralism
2. The challenges in the path of Sustainable Development cut across national boundaries, boundaries set by scientific disciplines and limited strategies for economic gain
3. Unilateral solutions are at times better than multilateral ones
4. Many countries

Correct Marks : 1 Wrong Marks : 0

"The Western Ghats are second only to the Eastern Himalaya as a treasure trove of biological diversity in India. Originally recognized as among the several global 'hotspots of biodiversity', the Western Ghats along with its geographical extension in the wet zone of Sri Lanka are now also considered one of the eight 'hottest hot spots' of biodiversity (Myers et al. 2000). At the same time, the high human population density and major transformation of the landscape since the mid-18th century also emphasize the urgency of conservation of the Ghats and sustainable use of its resources. A study in the southern region, comprising the states of Karnataka, Kerala and Tamil Nadu, showed that between 1920–1990 about 40% of the original vegetation cover was lost or converted to another form of land use (Menon and Bawa 1997). It is estimated that not more than about 7% of the area of the Western Ghats is presently under primary vegetation cover, though a much larger area is under secondary forest or some form of tree cover. Nearly 15% of the Ghats is also under the Protected Area system."

(Extract from Gadgil Committee Report on the Western Ghats)

Which of the following is not implied in the passage given above

1. High human population density and major transformation of the landscape of the western ghats have necessitated urgent conservation efforts
2. The Western Ghats are no longer considered to be a bio-diversity hotspot
3. Less than 10% of the Western Ghats is presently under primary vegetation cover

Correct Marks : 1 Wrong Marks : 0

"The Commission has sought ways in which global development can be put on a sustainable path into the 21st Century. Some 5,000 days will elapse between the publication of our report and the first day of the 21st Century. What environmental crises lie in store over those 5,000 days? During the 1970s, twice as many people suffered each year from 'natural' disasters as during the 1960s. The disasters most directly associated with environment/development mismanagement - droughts and floods - affected the most people and increased most sharply in terms of numbers affected. Some 18.5 million people were affected by drought annually in the 1960s, 24.4 million in the 1970s. There were 5.2 million flood victims yearly in the 1960s, 15.4 million in the 1970s. Numbers of victims of cyclones and earthquakes also shot up as growing numbers of poor people built unsafe houses on dangerous ground. The results are not in for the 1960s. But we have seen 35 billion afflicted by drought in Africa alone and tens of millions affected by the better managed and thus less-publicized Indian drought. Floods have poured off the deforested Andes and Himalayas with increasing force. The 1960s seem destined to sweep this dire trend on into a crisis-filled 1990s."

Extract from "Our Common Future"

Which of the following is implied in the passage given above?

1. The commission fears that many environmentally adverse events may happen in the 5000 days after the publication of the report
2. Environmental disasters due to environment/development mismanagement have frequently occurred in the years preceding the publication of the report.
3. The Himalayas have been unaffected by the negative effects of environment/development mismanagement
4. Only (1) and (2) above
