Read the passage and answer the questions which follow

“Take any action allowed to be vicious : wilful murder, for instance. Examine it in all lights, and see if you can find that matter of fact, or real existence, which you call vice. In which – even way you take it, you find only certain passions, motives, volitions and thoughts. There is no other matter of fact in the case. The vice entirely escapes you, as long as you consider the object. You can never find it, till you turn your reflexion into your own breast and find a sentiment or disapprobation, which arise in you, towards this action. Here is a matter of fact; but it’s the object of feeling, not of reason. It lies in yourself, not the object”.
