Read the passage carefully and attempt questions.

Colour is all around us in many forms. It is one of the most important aspects of all textile materials - be it for apparel, household, commercial or institutional use. The identity of the product is most often attributed to colour. Everyone responds to colour and has definite preferences. Colour reflects the season, events and the spirit of people. The choice is affected by culture, tradition, climate, season, occasion or purely personal reason. Colour is an important part of fashion. Designers carefully choose fabric colours to make a definite statement.

Colour can be defined as reflection of light striking the surface of an object. It is the visual sensation resulting from reflection of visible light rays that strike the retina and stimulate cells in the nerves of the eye. The nerves send a message to the brain, which produces a sensation of a specific kind, and we see colour. The colour that is observed by the brain is dependent on the particular wavelength or combination of wavelengths of the light source. To see colour on any material, light must be reflected from the object to be seen by the eye. When all light rays are reflected, the object appears white; when none are reflected it is black. The intensity is the purity of colour. The colours, which are displayed in a rainbow are represented by the acronym VIBGYOR. We see a rainbow, because white light is split into different wavelengths.

Light rays when they enter our eyes, strike the :
(1) Retina
(2) Choroid
(3) Iris
(4) Rod cells

Colour is all around us in many forms. It is one of the most important aspects of all textile materials - be it for apparel, household, commercial or institutional use. The identity of the product is most often attributed to colour. Everyone responds to colour and has definite preferences. Colour reflects the season, events and the spirit of people. The choice is affected by culture, tradition, climate, season, occasion or purely personal reason. Colour is an important part of fashion. Designers carefully choose fabric colours to make a definite statement.

Colour can be defined as reflection of light striking the surface of an object. It is the visual sensation resulting from reflection of visible light rays that strike the retina and stimulate cells in the nerves of the eye. The nerves send a message to the brain, which produces a sensation of a specific kind, and we see colour. The colour that is observed by the brain is dependent on the particular wavelength or combination of wavelengths of the light source. To see colour on any material, light must be reflected from the object to be seen by the eye. When all light rays are reflected, the object appears white; when none are reflected it is black. The intensity is the purity of colour. The colours, which are displayed in a rainbow are represented by the acronym VIBGYOR. We see a rainbow, because white light is split into different wavelengths.

Choice of colour is not affected by:

(1) Culture
(2) Occasion
(3) Personal preference
(4) Monetary value

A: 1
B: 2
C: 3
D: 4
A colour can be seen by the eye when light is:

(1) absorbed from object
(2) reflected from object
(3) passed through primary colours

Read the passage carefully and attempt questions.

Choose the correct answer from the options given below:

(1) (A) - (IV), (B) - (II), (C) - (III), (D) - (I)
(2) (A) - (III), (B) - (IV), (C) - (I), (D) - (II)
(3) (A) - (I), (B) - (III), (C) - (II), (D) - (IV)
(4) (A) - (II), (B) - (I), (C) - (IV), (D) - (III)
Match List - I with List - II.

<table>
<thead>
<tr>
<th>List - I</th>
<th>List - II</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>(Divisions)</strong></td>
<td><strong>(Activity)</strong></td>
</tr>
<tr>
<td>(A) Merchandising division</td>
<td>(I) Inventory control</td>
</tr>
<tr>
<td>(B) Finance and control division</td>
<td>(II) Fashion coordination</td>
</tr>
<tr>
<td>(C) Operational division</td>
<td>(III) Publicity and public relation</td>
</tr>
<tr>
<td>(D) Sales and Promotion division</td>
<td>(IV) Customer service and receiving and making of merchandise</td>
</tr>
</tbody>
</table>

Choose the correct answer from the options given below:

1. (A) - (I), (B) - (II), (C) - (III), (D) - (IV)
2. (A) - (IV), (B) - (I), (C) - (II), (D) - (III)
3. (A) - (II), (B) - (I), (C) - (IV), (D) - (III)
4. (A) - (I), (B) - (IV), (C) - (III), (D) - (II)

| A: 1 |
| B: 2 |
| C: 3 |
| D: 4 |

---

Match List - I with List - II.

<table>
<thead>
<tr>
<th>List - I</th>
<th>List - II</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Terminology</strong></td>
<td><strong>Correct Description</strong></td>
</tr>
<tr>
<td>(A) Bowed filling</td>
<td>(I) Warp yarns having a longer diameter/smaller diameter</td>
</tr>
<tr>
<td>(B) Kink</td>
<td>(II) The colour of one area has bled</td>
</tr>
<tr>
<td>(C) Coarse end and fine end</td>
<td>(III) Filling yarns/colour patterns having a curvature</td>
</tr>
<tr>
<td>(D) Colour Run</td>
<td>(IV) A short length of yarn systematically doubled on itself</td>
</tr>
</tbody>
</table>

Choose the correct answer from the options given below:

1. (A) - (III), (B) - (IV), (C) - (I), (D) - (II)
2. (A) - (I), (B) - (II), (C) - (III), (D) - (IV)
3. (A) - (III), (B) - (I), (C) - (II), (D) - (IV)
4. (A) - (IV), (B) - (III), (C) - (II), (D) - (I)

<p>| A: 1 |
| B: 2 |
| C: 3 |
| D: 4 |</p>
