(2) Agility  
(3) Mental Acumen  
(4) Power

A: 1
B: 2
C: 3
D: 4

Read the passage given below and answer the questions.

A national sports team was winning all the competitions and was extremely admired for its hard work. An interview with the national team to discover and explore the ins and outs for its constant success emphasized the following details. As per the report, the team had many fresh players who were well prepared accountable, self-disciplined and accurate in their job and contributed to the achievement of the team. The captain had been carefully chosen by the team fellows themselves, and he was most cooperative, friendly and positive on the ground as well as off it. This made him a good leader. The best part of the team was that, all its senior players were supportive and helpful with their juniors and were always eager to listen to them. The team’s coach stated few essential components that had contributed to the team’s achievement. According to him, the ability to inspire and encourage individuals plays a critical role in the team’s achievements more often than the technical skills, and this is what divides a good coach from an average one. The coach also referred to occasions when players went through the period of lack of intrinsic motivation. The coach realized that while there are some players have their own set of goals and aspirations, however, for the remaining part, it was up to the coach to motivate them by involving them in activities that help them develop a sense of achievement.
A national sports team was winning all the competitions and was extremely admired for its hard work. An interview with the national team to discover and explore the ins and outs for its constant success emphasized the following details. As per the report, the team had many fresh players who were well prepared accountable, self-disciplined and accurate in their job and contributed to the achievement of the team. The captain had been carefully chosen by the team fellows themselves, and he was most cooperative, friendly and positive on the ground as well as off it. This made him a good leader.

The best part of the team was that, all its senior players were supportive and helpful with their juniors and were always eager to listen to them. The team’s coach stated few essential components that had contributed to the team’s achievement. According to him, the ability to inspire and encourage individuals plays a critical role in the team’s achievements more often than the technical skills, and this is what divides a good coach from an average one. The coach also referred to occasions when players went through the period of lack of intrinsic motivation. The coach realized that while there are some players have an instinctive drive to regularly strive for success and enjoy their task, there are others who seem to lack internal motivation and need extrinsic factors like rewards, prize, money etc, to create the required drive or required behavior.

The team’s psychologist spoke about the aggressive behavior among the team players against the opponents.

It was interesting to listen to various occurrences where the players had instigated opponents or charged at them aggressively, in anger, but had later tried to defend their actions.

Occasionally, players were found to be abusing opponents not in anger, but to get a benefit or for the sake of winning, though this behavior is not adequate and they were given punishments as per the code of conduct and rules of sports.

According to coach what plays a critical role in team’s achievement?

1. The ability to inspire and encourage individual
2. Rewards
3. Punishments
4. Motivational talks
Read the passage given below and answer the questions.

A national sports team was winning all the competitions and was extremely admired for its hard work. An interview with the national team to discover and explore the ins and outs for its constant success emphasized the following details. As per the report, the team had many fresh players who were well prepared, accountable, self-disciplined, and accurate in their job and contributed to the achievement of the team. The captain had been carefully chosen by the team fellows, and he was most cooperative, friendly, and positive on the ground as well as off it. This made him a good leader.

The best part of the team was that, all its senior players were supportive and helpful with their juniors, and were always eager to listen to them. The team’s coach stated a few essential components that had contributed to the team’s achievement. According to him, the ability to inspire and encourage individuals plays a critical role in the team’s achievements more often than the technical skills, and this is what divides a good coach from an average one. The coach also referred to occasions when players went through the period of lack of intrinsic motivation. The coach realized that while there are some players who have an instinctive drive to regularly strive for success and enjoy their task, there are others who seem to lack internal motivation and need extrinsic factors like rewards, prize, money etc., to create the required drive or required behavior.

The team’s psychologist spoke about the aggressive behavior among the team players against the opponents.

It was interesting to listen to various occurrences where the players had instigated opponents or charged at them aggressively, in anger, but had later tried to defend their actions.

Occasionally, players were found to be abusing opponents not in anger, but to get a benefit or for the sake of winning, though this behavior is not adequate and they were given punishments as per the code of conduct and rules of sports.

“Occasionally players were found to be abusing opponents not in anger, but to get a benefit or for the sake of winning” what kind of action must be taken against such players?

(1) Players must be rewarded
(2) Players must be punished as per code of conduct and the rules of the game.
(3) Players must be encouraged
(4) Players must be allowed to do the same
A national sports team was winning all the competitions and was extremely admired for its hard work. An interview with the national team to discover and explore the ins and outs for its constant success emphasized the following details. As per the report, the team had many fresh players who were well prepared, accountable, self-disciplined and accurate in their job and contributed to the achievement of the team. The captain had been carefully chosen by the team fellows themselves, and he was most cooperative, friendly and positive on the ground as well as off it. This made him a good leader.

The best part of the team was that, all its senior players were supportive and helpful with their juniors and were always eager to listen to them. The team’s coach stated few essential components that had contributed to the team’s achievement. According to him, the ability to inspire and encourage individuals plays a critical role in the team’s achievements more often than the technical skills, and this is what divides a good coach from an average one.
