She thinks how she fought a flood during her husband's absence. She stood for hours in the drenching downpour, and dug an overflow gutter to save the dam across the creek. But she could not save it. There are things that a bushwoman cannot do. Next morning the dam was broken, and her heart was nearly broken too, for she thought how her husband would feel when he came home and saw the result of years of labour swept away. She cried then.

She also fought the pleuro-pneumonia - dosed and bled the few remaining cattle, and wept again when her two best cows died.

Again, she fought a mad bullock that besieged the house for a day. She made bullets and fired at him through cracks in the slabs with an old shot-gun. He was dead in the morning. She skinned him and got seventeen-and-sixpence for the hide.

She also fights the crows and eagles that have designs on her chickens. Her plan of campaign is very original. The children cry "Crows, mother!" and she rushes out and aims a broomstick at the birds as though it were a gun, and says "Bung!" The crows leave in a hurry; they are cunning, but a woman's cunning is greater.

Occasionally a bushman in the horrors, or a villainous looking sundowner, comes and nearly scares the life out of her. She generally tells the suspicious-looking stranger that her husband and two sons are at work below the dam, or over at the yard, for he always cunningly inquires for the boss.

Given below are two statements: One is labelled as Assertion (A) and the other is labelled as Reason (R)

Assertion (A): If volumes of two spheres are in the ratio 125:64, then their surface areas will be in the ratio 25:16.

Reason (R): If volumes of two spheres are V_1, V_2 and their respective surface areas are S_1, S_2 , then

$$\frac{S_1}{S_2} = \left(\frac{V_1}{V_2} \right)^{\frac{2}{3}}$$
