**Question Numbers : (1 to 5)**

Question Label : Comprehension

According to the United Nations (UN) population estimates, this year, the population of India surpassed or will surpass that of China. Since 1950, the year the UN began keeping track of population data, China has been the most populous country. In the forthcoming decades, perhaps even centuries, this position will belong to India.

A key question that has resurfaced in this background is whether the large population is the bane of the Indian economy or boon for it.

### **Two relevant questions**

In answering this question, the common practice is to compare India to China. But this is wholly misleading since the policy histories of the two countries are vastly different, China is a much richer country today than India. This means that even if it is at a disadvantage purely in terms of the composition of its population – for example, those 65 years or older make 13% of its population against only 7% of India's – it may be better placed to take care of its elderly.

The right way to pose the question therefore is not a comparison with China but to ask whether on a net basis a younger and larger population is more beneficial than an older and smaller population for the country.

These are two distinct questions with the first relating to the composition and the second to the size of the population. As such, they must be considered separately in succession.

### **Young demography helps**

It should be relatively uncontroversial that the advantages of a young population far outweigh its disadvantages. First, a younger population translates in a proportionately large workforce and therefore higher gross domestic product (GDP) given the technology and volume of capital available.

Second, given that the young save more than the old, a younger population also translates in higher saving and therefore higher investment. The higher investment further adds to the GDP. Finally, a younger population brings greater energy and vibrancy to a nation, leading to more innovation and its greater exploitation.

A concern commonly expressed about a younger population is that it leads to greater unemployment. But the unemployment rate depends on policies, which surely do not depend on the age composition of the population.

### **Underemployment challenge**

Factually, the unemployment rate in India has been consistently low in the 3-5% range. As I have argued in numerous writings, unemployment is not India's problem, it is underemployment. On this score, the output per worker has seen a clear rising trend (meaning declining underemployment) alongside rising workforce in the post-reform era. What is needed is acceleration in this trend. That in turn required further policy reform, not the older population.

Turning to the size question, I would argue that the benefits of a larger population also far outweigh its costs. There are vast benefits arising from economies of scale in the provision of public goods. Takes, for example, India's digital infrastructure. Once this infrastructure is created, it is there for all to use.

### **Sub questions**

**Question Number : 1 Question Id : 92090610332 Question Type : MCQ Option Shuffling : No Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum**

**Instruction Time : 0**

**Correct Marks : 4 Wrong Marks : 1**

In the passage there are references to two different questions. They are related to:

- (A) Composition
- (B) Size of the population
- (C) Technology and volume
- (D) Unemployment

Find the most appropriate options :

- (1) (A) and (C)
- (2) (A) and (B)
- (3) (A), (B), and (C)
- (4) (A), (B), and (D)

**Options :**

92090640801. 1

92090640802. 2

92090640803. 3

Rearrange the following sentences into a meaningful paragraph:

- (A) Research confirms that retaining mental sharpness requires certain life style interventions, specifically, adjusting what and how you eat, how much you exercise, how you deal with life's challenges and how you interact with others.
- (B) The good news is that declining brain health and cognitive loss are not inevitable.
- (C) If you turn these behaviours into habits that you can sustain over the long term that will have dramatic effects not only on your cognitive fitness, but also on your overall health.
- (D) Maintaining cognitive fitness requires far more than a simple "train your brain" programme or diet as some quick fix online programmes suggest:

Choose the correct answer from the options given below :

- (1) (B), (D), (A), (C)
- (2) (B), (A), (C), (D)
- (3) (A), (C), (B), (D)
- (4) (A), (D), (B), (C)

सूची I के साथ सूची II का मिलान कीजिए

सूची-I	सूची -II
(A) कोपर	(I) एंटी फैरोमग्नेटिक
(B) $\text{BaTiO}_3$	(II) फैरोइल्कट्रिक
(C) $\text{CoO}$	(III) अर्धचालक
(D) जर्मनियम	(IV) धातु

नीचे दिए गए विकल्पों में से सही उत्तर का चयन कीजिए:

- (1) A-I, B-II, C-IV, D-III
- (2) A-IV, B-II, C-I, D-III
- (3) A-II, B-III, C-IV, D-I
- (4) A-III, B-IV, C-II, D-I

Given below are two statements, one is labelled as Assertion (A) and the other is labelled as Reason (R) :

**Assertion (A) :** In a photoelectric effect experiment, the intensity of light beam does not change the maximum energy of an ejected photoelectron.

**Reason (R) :** Intensity of light does not relate to energy carried by electromagnetic waves.

In the light of the above statements, choose the *most appropriate answer* from the options given below.

1. Both (A) and (R) are correct and (R) is the correct explanation of (A)
2. Both (A) and (R) are correct but (R) is not the correct explanation of (A)
3. (A) is correct but (R) is not correct
4. (A) is not correct but (R) is correct

कथन I : यदि  $\Delta x$ ,  $x$  घटक की स्थिति मापने की अनिश्चितता दर्शाती है और  $x$  घटक के समकालिक संवेग की अनिश्चितता  $\Delta px$  है, तो  $\Delta x \cdot \Delta px \geq \frac{h}{4\pi}$  होता है। ( $h$  प्लांक का स्थिरांक)

कथन II : क्वांटम यांत्रिकी में, किसी बाक्स में परिरूपित किसी कण की न्यूनतम ऊर्जा शून्य हो शक्ति है।

उपरोक्त कथन के आलोक में, नीचे दिए गए विकल्पों में से सबसे उपयुक्त उत्तर का चयन कीजिए

1. कथन I और II दोनों सही है
- (2) कथन I और II दोनों गलत है
- (3) कथन I सही है, लेकिन कथन II गलत है
- (4) कथन I गलत है, लेकिन कथन II सही है

Let  $U = \{1, 2, 3, \dots, 20\}$ . Let  $X, Y, Z$  be the subsets of  $U$ .

Let  $X$  be the set of all numbers, which are perfect squares.

Let  $Y$  be the set of all numbers, which are multiples of 5.

Let  $Z$  be the set of all numbers, which are divisible by 2 and 3.

Consider the following statements and select the true statements :

A.  $X, Y, Z$  are mutually exclusive

B.  $X, Y, Z$  are mutually exhaustive

C. The number of elements in the complement set of  $X \cup Y$  is 12

Choose the correct answer from the options given below.

1. A and B only

2. A and C only

3. B and C only

4. A only

**Options :**

माना  $u = \{1, 2, 3, \dots, 20\}$ . यदि  $X, Y, Z, U$  के उपसमुच्य हैं।

और यदी

$X$  सभी पूर्ण वर्ग संख्याओं का समुच्य है।

$Y$  उन सभी संख्याओं का समुच्य है जो 5 के गुणज हैं तथा

$Z, 2$  और  $3$  से भाज्य होने वाली सभी संख्याओं समुच्य हैं।

ऊपर सभी पर विचार करते हुए नीचे दिए गए उचित कथन चुनिए

- A.  $X, Y, Z$  परस्पर अपवर्जी हैं
- B.  $X, Y, Z$  परस्पर निश्चेष हैं
- C. पूरक समुच्य  $A \cup B$  में अवयवों की संख्या 12 है

नीचे दिए गए विकल्पों में से सही उत्तर का चयन कीजिए :

- 1) केवल  $A$ , और  $B$
- 2) केवल  $A$  और  $C$
- 3) केवल  $B$  और  $C$
- 4) केवल  $A$

Given below are two statements, one is labelled as Assertion (A) and the other is labelled as Reason (R) :

**Assertion (A) :** To determine average rate of change of concentration of CO<sub>2</sub> in the atmosphere for the entire period, when the rates of change of concentration in different periods is given, geometric mean can be used.

**Reason (R) :** The geometric mean is one of the measures of central tendency and is defined as the  $n$ th root of the product of given  $n$  positive observations.

In the light of the above statements, choose the *most appropriate answer* from the options given below.

1. Both (A) and (R) are true and (R) is the correct explanation of (A)
2. Both (A) and (R) are true but (R) is not the correct explanation of (A)
3. (A) is true but (R) is false
4. (A) is false but (R) is true

Given below are two statements :

**Statement-I :** According to one investigator's model, the data are like 50 draws made at random from large box. The null hypothesis says that average of the box is equal to 100. The alternative says that average of box is more than 100. The average of the draw is 107.3 and the SD is 22.1. The SE for sample average is 3.1. Now  $z = \left( \frac{107.3 - 100}{3.1} \right) = 2.35$  and  $P = 1\%$ .

**Statement-II :** If the null hypothesis is right, there is only a 1% chance of getting a Z value bigger than 2.35.

In the light of the above statements, choose the **correct** answer from the options given below.

1. Both Statement-I and Statement-II are true
2. Both Statement-I and Statement-II are false
3. Statement-I is true but Statement-II is false
4. Statement-I is false but Statement-II is true

नीचे दो कथन दिए गए हैं:

कथन I

एक अन्वेषण (जांच) मॉडल के अनुसार, एक बड़े बक्से में 50 यादच्छिक कर्ष (ड्रा) निकाले जाते हैं। निराकरणीय परिकल्पना कहती है कि बाक्स का औसत 100 के बराबर है। वैकल्पिक परिकल्पना कहता है कि बाक्स का औसत 100 से अधिक है। कर्ष (ड्रा) का औसत 107.3 और मानक विचलन 22.1 है। प्रतिदर्श के औसत का SE (Standard Error) 3.1 है तो  $z = \left( \frac{107.3 - 100}{3.1} \right) = 2.35$  और  $P = 1\%$ .

कथन II

यदि निराकरणीय परिकल्पना उचित है तो Z मान की 2.35. होने की संभावना केवल 1% है।

उपरोक्त कथन के आलोक में, नीचे दिए गए विकल्पों में से सबसे उपयुक्त उत्तर का चयन कीजिए

1. कथन I और II दोनों सही है
- (2) कथन I और II दोनों गलत है
- (3) कथन I सही है, लेकिन कथन II गलत है
- (4) कथन I गलत है, लेकिन कथन II सही है

Given below are two statements :

Statement-I : In computer networking, bandwidth is often used as a synonym for data transfer rate.

Statement-II : Wider the bandwidth of a communication system, greater is the amount of data that can be transferred over a fixed period of time.

In the light of the above statements, choose the *correct* answer from the options given below.

1. Both Statement-I and Statement-II are true
2. Both Statement-I and Statement-II are false
3. Statement-I is true but Statement-II is false
4. Statement-I is false but Statement-II is true

**Options :**

92090641065. 1

92090641066. 2

92090641067. 3

92090641068. 4

**Question Number : 67 Question Id : 92090610398 Question Type : MCQ Option Shuffling : No Is**

**Correct Marks : 4 Wrong Marks : 1**

नीचे दो कथन दिए गए हैं:

कथन I : कम्प्युटर जाल तंत्र में, बैंड चौड़ाई को डाटा स्थानांतरण दर के पर्याय की तरह प्रयोग किया जाता है

कथन II : जितनी एक संचार तंत्र की बैंड चौड़ाई, चौड़ी होती है, उतना अधिक मात्रा में डाटा किसी निश्चित काल में, संचरित किया जा सकता है

उपरोक्त कथन के आलोक में, नीचे दिए गए विकल्पों में से सबसे उपयुक्त उत्तर का चयन कीजिए

1. कथन I और II दोनों सही है
- (2) कथन I और II दोनों गलत है
- (3) कथन I सही है, लेकिन कथन II गलत है
- (4) कथन I गलत है, लेकिन कथन II सही है

**Options :**

92090641065. 1  
92090641066. 2  
92090641067. 3  
92090641068. 4

**Question Number : 68 Question Id : 92090610399 Question Type : MCQ Option Shuffling : No Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0**

**Correct Marks : 4 Wrong Marks : 1**

Choose the correct statements about type of network and the respective network range.

- A. LAN has network range up to a few kilometers
- B. WAN has suitability over large geographical areas, often a country or continent
- C. MAN has network range between 5 to 100 km
- D. PAN has network range of less than 10 m

Choose the correct answer from the options given below.

1. A, B and C only
2. A, C and D only
3. B, C and D only
4. A, B, C and D only

**Options :**

- 92090641069. 1
- 92090641070. 2
- 92090641071. 3
- 92090641072. 4

**Correct Marks : 4 Wrong Marks : 1**

जालतंत्र के प्रकार और उनकी अपने निजी जालतंत्र परिसर के लिए उचित कथन चुनिए

- A. LAN की जालतंत्र परिसर कुछ किलोमीटर तक होता है
- B. WAN की उपयुक्तता बड़े भौगोलिक क्षेत्र अधिकतर एक देश या महाद्रीप तक होती है
- C. MAN की जालतंत्र परिसर 5 से 100 कि.मी. तक होता है
- D. PAN का जालतंत्र परिसर 10 मीटर से कम होता है

नीचे दिए गए विकल्पों में से सही उत्तर का चयन कीजिए:

- 1. A, B और C,
- 2. A, C और D
- 3. B, C, और D
- 4. A, B, C और D

**Options :**

- 92090641069. 1
- 92090641070. 2
- 92090641071. 3

Given below are two statements, one is labelled as Assertion (A) and the other is labelled as Reason (R) :

**Assertion (A) :** Tropical rain forest of the earth occurs in intertropical convergence zone of high temperature and heavy rainfall.

**Reason (R) :** The lower atmosphere from 10 °N to 10 °S of the equator is heated, expands and becomes less dense. Rising hot air cools because it expands as it rises, resulting in heavy average precipitation.

In the light of the above statements, choose the *correct answer* from the options given below.

1. Both (A) and (R) are true and (R) is the correct explanation of (A)
2. Both (A) and (R) are true but (R) is not the correct explanation of (A)
3. (A) is true but (R) is false
4. (A) is false but (R) is true

**Options :**

92090641145. 1  
92090641146. 2

92090641147. 3

92090641148. 4

नीचे दो कथन दिए गए हैं: एक अभिकथन (Assertion A) के रूप में लिखित है तो दूसरा उसके कारण (Reason R) के रूप में;

**अभिकथन A :** पृथ्वी के उष्णकटिबंधीय वर्षावन, उच्च तापमान और भारी वर्षा के अंतः उष्णकटिबंधीय अभिसरण क्षेत्र में पाए जाते हैं

**कारण R :** भूमध्य रेखा का  $10^{\circ}\text{N}$  to  $10^{\circ}\text{S}$  का निचला वायुमंडल गर्म होकर फैल जाता है और उसका घनत्व कम हो जाता है। ऊपर जाती हुई गर्म हवा ठंडी हो जाती है क्योंकि जैसे हि यह ऊपर जाती है फैल जाती है और उसका परिणाम भारी औसत वर्षा होता है

उपरोक्त कथन के आलोक में, नीचे दिए गए विकल्पों में से सहीउत्तर का चयन कीजिए

- (1) A और R दोनों सही हैं और R, A की सही व्याख्या है
- (2) A और R दोनों सही हैं, लेकिन R, A की सही व्याख्या नहीं है
- (3) A सही है, लेकिन R सही नहीं है
- (4) A सही नहीं है, लेकिन R सही है

यदि किसी शाखा (प्रवाह) की चौड़ाई 100 मीटर, गहराई 15 मी. है और वह 3 मीटर/सेकेन्ड की चाल से प्रवाहित हो रही है तो प्रवाह (शाखा) की निकासी क्या होगी?

1.  $300 \text{ m}^3/\text{s}$
2.  $1500 \text{ m}^3/\text{s}$
3.  $500 \text{ m/s}$
4.  $4500 \text{ m}^3/\text{s}$

**Options :**

92090641177. 1

92090641178. 2

92090641179. 3

**Correct Marks : 4 Wrong Marks : 1**

Given below are two statements, one is labelled as Assertion (A) and the other is labelled as Reason (R) :

**Assertion (A) :** Ozone hole is more prominent over Antarctica (South Pole) between altitude of 15 km and 20 km during September/October months.

**Reason (R) :** Special vortex weather conditions in the lower stratosphere above south pole in winter causes denitrification and lead to conversion of inactive chlorine into  $\text{Cl}_2$  and HOCl. These two compounds produce atomic Chlorine when sunlight appears and destroy ozone.

In the light of the above statements, choose the *correct answer* from the options given below.

1. Both (A) and (R) are correct and (R) is the correct explanation of (A)
2. Both (A) and (R) are correct but (R) is not the correct explanation of (A)
3. (A) is true but (R) is false
4. (A) is false but (R) is true

**Options :**

92090641181. 1  
92090641182. 2  
92090641183. 3  
92090641184. 4

**Question Number : 96 Question Id : 92090610427 Question Type : MCQ Option Shuffling : No Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0**

**Correct Marks : 4 Wrong Marks : 1**

नीचे दो कथन दिए गए हैं: एक अभिकथन (Assertion A) के रूप में लिखित है तो दूसरा उसके कारण (Reason R) के रूप में;

अभिकथन A : ओजोन छिद्र अंटार्कटिका (दक्षिणी ध्रुव) पर, सितम्बर/ अक्टूबर महीनों में, 15 और 20 किलोमीटर की ऊँचाई के बीच अधिक सुप्रकट होता है।

कारण R : नीचे के समताप मंडल में, दक्षिणी ध्रुव के ऊपर, सर्दी में विशेष चक्रवात जलवायु स्थिति, विनाइट्रकरण उत्पन्न करती है, और असक्रिय क्लोरिन को  $\text{Cl}_2$  और  $\text{HOCl}$  में परिवर्तित कर देती है। ये दो घटक सूर्य की किरणों के आने पर अणु क्लोरिन को पैदा करती हैं जो ओजोन को नष्ट करती है।

उपरोक्त कथन के आलोक में, नीचे दिए गए विकल्पों में से सही उत्तर का चयन कीजिए

- (1) A और R दोनों सत्य हैं और R, A की सही व्याख्या है
- (2) A और R दोनों सत्य हैं, लेकिन R, A की सही व्याख्या नहीं है
- (3) A सत्य हैं, लेकिन R असत्य है
- (4) A असत्य हैं, लेकिन R सत्य है

Given below are two statements, one is labelled as Assertion (A) and the other is labelled as Reason (R) :

**Assertion (A) :** Year round high temperature and high rainfall leaches basic cations and also promotes transformation and subsequent leaching of Si, leaving iron and aluminium oxide minerals into the soil. Such soils are termed as acidic soils.

**Reason (R) :** Soluble aluminium and presence of pyrite minerals can release protons into soilsssss environment and lead to formations of soil acidic conditions.

In the light of the above statements, choose the *correct answer* from the options given below.

1. Both (A) and (R) are true and (R) is the correct explanation of (A)
2. Both (A) and (R) are true but (R) is not the correct explanation of (A)
3. (A) is true but (R) is false
4. (A) is false but (R) is true

नीचे दो कथन दिए गए हैं: एक अभिकथन (Assertion A) के रूप में लिखित है तो दूसरा उसके कारण (Reason R) के रूप में;

अभिकथन A : पूरे वर्ष उच्च ताप और भारी वर्षा के कारण मूलभूत धनायन विक्षालित हो जाते हैं और Si को घुल कर बह जाने में और बदलाव में मदद करते हैं; जिस कारण आयरन और अलुमीनीयम ऑक्साइड के खनिज मृदा में शेष रह जाते हैं। ऐसी मृदा को अम्लीय मृदा कहते हैं।

कारण R : घुलनशील अलुमीनियम एवं पाइराईट खनिजों की उपस्थिति मृदा वातावरण में प्रोटॉन छोड़ते हैं और मृदा में अम्लीय स्थिति पैदा करते हैं।

उपरोक्त कथन के आलोक में, नीचे दिए गए विकल्पों में से सही उत्तर का चयन कीजिए

- (1) A और R दोनों सत्य हैं और R, A की सही व्याख्या है
- (2) A और R दोनों सत्य हैं, लेकिन R, A की सही व्याख्या नहीं है
- (3) A सत्य है, लेकिन R असत्य है
- (4) A असत्य है, लेकिन R सत्य है

Given below are two statements, one is labelled as Assertion (A) and the other is labelled as Reason (R) :

**Assertion (A) :** Metro cities in the northern India encounter severe case of air pollution during winter time due to biomass, crop-residue burning in the States of Haryana and Punjab and frequent temperature inversion conditions.

**Reason (R) :** Photochemical smog is formed by photochemical reactions among NO<sub>x</sub>, volatile organic compounds in the presence of sunlight. This is more frequent when the earth is tilted towards sun.

In the light of the above statements, choose the *most appropriate answer* from the options given below.

1. Both (A) and (R) are correct and (R) is the correct explanation of (A)
2. Both (A) and (R) are correct but (R) is not the correct explanation of (A)
3. (A) is correct but (R) is not correct
4. (A) is not correct but (R) is correct

नीचे दो कथन दिए गए हैं: एक अभिकथन (Assertion A) के रूप में लिखित है तो दूसरा उसके कारण (Reason R) के रूप में;

अभिकथन A : उत्तरी भारत के महानगरीय शहरों में सर्दी के समय में, पंजाब और हरियाणा में जैव पदार्थ और फसलों के अवशेष जलाने से और निरंतर तापमान प्रतिलोमन की स्थितिओं के कारण, वायु प्रदूषण के अनेक मामले होते हैं।

कारण R : प्रकाश रसायनिक स्मोग, NO<sub>x</sub> और वाष्पशील कार्बनिक यौगिक के बीच सौर प्रकाश की उपस्थित में प्रकाश रसायनिक अमिक्रियाओं के कारण बनती है, जब पृथ्वी सूर्य की तरफ झुकी होती है तो यह अधिक होती है।

उपरोक्त कथन के आलोक में, नीचे दिए गए विकल्पों में से सही उत्तर का चयन कीजिए

- (1) A और R दोनों सत्य हैं और R, A की सही व्याख्या है।
- (2) A और R दोनों सत्य हैं, लेकिन R, A की सही व्याख्या नहीं है।
- (3) A सत्य है, लेकिन R असत्य है।
- (4) A असत्य है, लेकिन R सत्य है।

Choose the correct statements :

- A. High dissolved oxygen in water can cause gas bubble disease
- B. Cadmium poisoning cause itai-itai disease
- C. High nitrate ion concentration in water causes blue baby syndrome
- D. Arsenic contamination and exposure causes Minamata disease
- E. High soluble carbonates cause acidity in lake water

Choose the correct answer from the options given below.

- 1. B, C and D only
- 2. B, C and E only
- 3. A, B and C only
- 4. A, B, D and E only
