Read the passage given below and answer the questions which follow it :

The definition of social media is-the relationship that exists between a network of people. In the last few decades, the online world has undergone dramatic shifts. From being a small, selective neighbourhood open only to a few, it is now a 'global village' connecting the richest and poorest alike.

The exponential growth of social media has both pros and cons. It is a mixed blessing, as it were. On one hand, it makes immediate communication possible. In the twinkling of an eye, a student studying in far-off America can share her graduation photographs with her grandmother in a remote Indian village. On the other hand, cyber-stalking is a real menace, and internet frauds are commonplace. Parents complain of children spending countless hours immersed in role-playing games online, or even just watching reels and videos, and neglecting their study or household chores.

The astonishing growth of internet technology has certainly transformed our world, though we are yet to understand fully the impact it has led on human life and behaviour.
